JEWELL NURSERIES, INC.
Lake City, Minnesota

JEWELL NURSERIES, INC., is situated at the northwest edge of Lake City, Minnesota. Lake City is a town of 3,500 population on the west shore of Lake Pepin, in the fertile Upper Mississippi Valley.

Favored with a rich alluvial soil, the shelter of adjacent river valley bluffs that tower above it, and the steadyng effect of Lake Pepin on humidity and frost conditions, this large, old nursery has long proven its ability and capacity to produce quality merchandise in shrubs, trees, evergreens and perennials.

Facilities at "The Jewell" Consist of . . .

- Fifty thousand feet of greenhouse glass, of which about three-fifths is given over to the propagation and production of nursery stock and the remaining two-fifths devoted to production of potted plants, cut flowers, bedding plants and the like for the local retail trade.
- Irrigation for about 52 acres of the approximately 1,000 acres now under the control of the nursery by an overhead "Skinner System."
- One underground storage cellar of steel reinforced concrete construction 100 ft. wide and 200 ft. long with modern ventilation and electric lighting, in which sorting and grading operations may be carried out throughout the winter. Additional cellars, each 50 ft by 60 ft., of similar modern construction, used largely for storage and winter grafting.
- Packing House, 120 ft. by 50 ft., adjacent to private railway spur and concrete loading platforms.
- Billing House of cement block construction, 200 ft. by 200 ft., used largely for the temporary storage of spring dug trees, shrubs and evergreens and for the loading of commercial trucks and the trucks of customers who call for their orders in the fall and spring.
- Office buildings, two residences, barns and machine sheds.

With the above facilities and a crew of seasoned and experienced nurserymen, "The Jewell" is equipped to produce, pack and deliver a diversified line of quality nursery stock.
